Customers Better*

NWC Installs 20,000 New Water Meters In Kingston and St. Andrew

NWC is in the process of replacing thousands of water meters in Kingston and St. Andrew. Under this project, we will be replacing old meters with new ones, as well as installing meters on premises that were previously un-metered.

Customers whose water meters are changed are encouraged to monitor and conserve their water usage as these new meters will increase the NWC's ability to accurately measure your consumption.
