

Invitation To Tender

Supply Of GPS Vehicle Tracking Service Islandwide

Conservation Tips

IN THE KITCHEN

- A dripping faucet can waste up to 7,600 litres (2,000 gallons) of water per year.
- Wipe away gravy, grease and food scraps from plates and bowls before washing.
- If you wash dishes by hand, don't leave the water running for rinsing. If you have two sinks, fill one with soapy water and one with rinse water. If you have only one sink, gather washed dishes in a dish rack and rinse them with a panful of water. Similarly, don't let the faucet run while you clean vegetables. Just rinse them in a sink or a pan of clean water.

OUTDOORS

- Instead of washing driveways, sidewalks, gutters and steps, use a hard broom to sweep these areas.
- Don't use fresh water for your plants and garden. Save the rinse water from your kitchen or laundry, and do your watering in the early morning - this prevents fungus growth, which occurs when you water at dusk.
- Don't let your children play with taps, hoses and sprinklers. Their innocent frolic on a hot day could waste hundreds of gallons of precious water.
- Wash your car with a bucket of water and a rag, not a running hose.

The National Water Commission invites tenders from suitably qualified entities to supply Global Positioning Satellite service to track its fleet of approximately four hundred (400) vehicles islandwide in real time or delayed time of no more than 3 seconds. Tracking capabilities should be able to determine the exact location of each vehicle on a twenty-four hour basis and should facilitate multiple users by way of computer devices.

Selection procedures will be restricted to companies that are currently registered with the National Contracts Commission (NCC) as suppliers of goods and services to the Government of Jamaica and possess a valid Tax Compliance Certificate. Opportunity is restricted to local suppliers.

Interested entities are required to collect the tender documents from:

**The Purchasing Manager
National Water Commission
18 Oxford Road
