### **Mechanical Problems Affect St. Mary Systems**

The National Water Commission wishes to advise customers in St. Mary who are served by the **Charles Town and Gibraltar Relift Stations** that the disruption they are currently experiencing in their water supply is due to mechanical problems at these facilities.

Repairs to these systems have already started and the meantime trucked water will be supplied to the affected areas. These areas include, **Gibraltar Heights, Tree Hill, Rock Cottage, Ross Common, Value Bush and Hill Sixty.**

The National Water Commission regrets any inconvenience caused and is making every effort to restore service at the earliest possible time.
