**MECHANICAL PROBLEM AFFECT GAYLE SPRING  
.....WATER SUPPLY DISRUPTED**

The National Water Commission is advising **residents of St. Mary in the communities of Gayle, Coombs Town, Hyatt Hill, Governors Pen, and Labyrinth Road** that the Gayle Spring system is temporarily out of service due to a mechanical problem affecting the pump.

Based on the extent of the problem, it is not expected that the system will be operable before Wednesday, February 3, 2010. Customers will therefore experience no water conditions for the duration of this period. In the meantime however, provisions have been made to have water trucked to the affected communities.

The National Water Commission apologizes for any inconvenience caused to its valued customers and is making every effort to restore service at the soonest possible time.
