### **Electrical Problems Affect Water Supply**

The National Water Commission is advising that it is currently experiencing electrical problems at the Hope Filter Plant and this has resulted in disruption in water supply to the Mona and Papine areas.

Areas affected include;

**Papine, University of the West Indies, University of Technology, University Hospital of the West Indies, Hope Pastures, August Town, Hope Flats, Gordon Town, Mona Heights, Hope Road and Beverley Hills.**

In the meantime, customers in sections of **Portmore, Spanish Town Road, Washington Boulevard, Molynes Road, and sections of Downtown Kingston** continue to experience no water conditions and low water pressure due to electrical problems on the Tulloch Spring System.

The National Water Commission is working to have these problems resolved in the shortest possible time and apologizes for any inconvenience caused.
