**ROAD IMPROVEMENT PROJECT MAY CAUSE POSSIBLE DISRUPTIONS**

The National Water Commission (NWC) wishes to remind all customers in the corporate area who are located between Dunrobin Avenue and Molynees Road, that they may experience possible disruptions in their regular water supply as road works continue.

Generally, road improvement works will at times mean the relocation or relaying of pipelines, or might result in broken mains, and damaged valves. These will in turn mean a disruption of water supply. In the event of scheduled disruptions, customers are advised well in advance. However, emergency situations do also occur, and it is these that prove particularly disruptive. Customers are therefore being reminded that it is imperative that they maintain adequate storage at all times. They should also practice water conservation to ensure that storage is not quickly depleted.

The NWC apologizes for any inconvenience caused and encourages customers to be prepared at all times, by maintaining adequate storage.
