Update – Mona Treatment Plant Water Supply Restored

The National Water Commission is advising its customers in large sections of the Corporate Area who are served by the **Mona Treatment Plant**, that the repairs to the triple break on the major 21-inch distribution main from the plant has been repaired.

Areas that were affected by this disruption in service included:

Mona, Cross Roads, Mountain View, Vineyard Town, Old Hope Road, Devon Square, Waterloo Road, Cassia Park, Eastwood Park, Half-Way-Tree Road, Upper Maxfield Avenue, New Kingston, Liguanea, Mona Road, Ravina, Hagley Park Road, Harbour View, Shooters Hill, Bull Bay

These customers will therefore, depending on their location, elevation, distribution and the customer demand in a particular area, gradually receive regular water supply as the system lines are re-charged throughout the day.

The National Water Commission thanks its valued customer for their patience and during the period of disruption.

-END-
