**Mechanical problems cause water supply disruption
... St. Thomas Systems Affected (Update)**

The National Water Commission is advising its customers in sections of St. Thomas who are served by the **Nutts River, Soho and Golden Valley water supply systems** that the extended disruption they have been experiencing in their service is due to mechanical problems associated with these systems.

The company is advising that every effort is being made to carry out the necessary repairs and restore normal water supply to its customers at the earliest possible time. In the meantime, however, trucked water will continue to be provided to the affected areas. These include: **Nutts River, Soho, Middleton, Spring Garden, Top Hill, Bonnett Burn and Golden Valley.**

The National Water Commission sincerely regrets any inconvenience caused by this extended disruption in service and will provide further updates on the matter.
