Dislocated Main Disrupts Water Supply in sections of Clarendon

The National Water Commission is advising customers in **sections of Clarendon** who are served by the **Rock River water supply system** that the disruption they are currently experiencing in their service is due to the dislocation of a distribution main caused by land slippage.

Areas that are affected by this disruption include: **Rock River, Tanarky, Gordon Wood and Tom Peter.**

The National Water Commission sincerely regrets any inconvenience caused and is making every effort to restore water supply at the earliest possible time.
