JWSIP Works Continue in Stony Hill, St. Andrew

As the Stony Hill Network Improvement works continue in St. Andrew, the National Water Commission is reminding its customers and commuters in the **Stony Hill area** that they will continue to experience disruptions in their water supply and vehicular traffic for the period **April 27 through to April 29, 2011.**

The works which are being carried out under the **Jamaica Water Supply Improvement Project (JWSIP)** will impact water supply to customers on **Old Stony Hill Road, Ridgefield Avenue, and Innswood Drive for the stated period as follows:**

Wednesday, April 27, 2011 – Old Stony Hill Road, Ridgefield Avenue

Thursday, April 28 – Friday, April 29, 2011 – Old Stony Hill Road

Friday, April 29, 2011 – Innswood Drive

Disruptions in water supply should be expected between the hours of 9:00am and 6:00pm, while lane restrictions will occur between 8:15am and 6:00pm. Customers are therefore being encouraged to store water for use during the period of disruption. Where there are lane restrictions, commuters are urged to observe and obey the signage and instructions of flag personnel in place.

The National Water Commission apologizes for any inconvenience caused and continues to crave the understanding of its customers and commuters as these necessary improvement works are being carried out.
