SCHEDULED 3-DAY DISRUPTION FOR STONY HILL ... JWSIP WORKS

As the National Water Commission continues work at the **Seaview Filter Plant** under the **Jamaica Water Supply Improvement Project (JWSIP)**, customers in **Stony Hill and surrounding areas of St. Andrew** are being reassured that their water supply will gradually return to service on **Thursday, November 17, 2011**. **Full restoration of service will however be on Friday, November 18, 2011**.

The company is also reminding customers in these areas that operations will resume on the usual regulated basis and as such the areas that are not normally served on Fridays will not see the return of their water supply until their scheduled service days. These areas include all roads leading off Golden Spring Road.

The National Water Commission thanks you for your continued patience while we work to improve the reliability in your water supply.
